Eskom has reported that they have lost one of the lines that supply KSD at 66kV, for them to effect repairs on this line they require the other line to be also switched off due to safety reasons. This emergence is impacting negatively on KSD more especially during this time of load shedding as KSD experiences total shutdown every time load shedding is declared. To address this emergency, tomorrow's outage is necessary.

As the supply of electricity may be restored without warning at any time, after being disconnected consumers are warned to treat their electricity installation as being **"LIVE"** throughout this period.

The inconvenience which this might cause is regretted.
