- 5.4 The Employee undertakes to actively focus towards the promotion and implementation of the KPAs (including special projects relevant to the employee's responsibilities) within the local government framework.
- 5.5 The criteria upon which the performance of Employee shall be assessed shall consist of two components.
- 5.5.1 The Employee must be assessed against both components, with a weighting of 80:20 allocated to the Key Performance Areas (KPAs) and the Core Competency Requirements (CCRs) respectively.
- 5.5.2 Each area of assessment will be weighted and will contribute to a specific part to the total score.
- 5.5.3 KPAs covering the main areas of work will account for 80% and CCRs will account for 20% of the final assessment.
- 5.6 The Employee's assessment will be based on her performance in terms of the outputs/outcomes (performance indicators) identified as per attached Performance Plan (Annexure A), which are linked to the KPA's and will constitute 80% of the overall assessment result as per the weightings agreed to between the Employer and Employee.
- 5.7 Key Performance Areas related to the functional areas of Employee must be subject to negotiation between the Employer and Employee.
- 5.8 Key performance areas with institutional and departmental weighting:

NO.	KEY PERFORMANCE AREA	INSTITUTIONAL	DEPARTMENTAL
KPA 1	Spatial Planning	8	N/A
KPA 2	Basic Service Delivery and Infrastructure Development	50	20
KPA 3	Financial Viability and Management	12	20
KPA 4	Local Economic Development	10	10
KPA 5	Good Governance and Public Participation	10	40
KPA 6	Municipal Transformation and Institutional Development	10	10
	TOTAL	100	100 (80%)

The weighting above for 2023/24 financial year is based on the outcomes of the Strategic Planning.

The primary key performance and focus area for 2023/24 financial year is **Basic Service Delivery and Infrastructure Development**. This Key performance area serves as an enabler for economic development. Services and infrastructure play a key role in harnessing investors and enabling infrastructure based economic activities. A greater percentage of the Municipality's budget goes to Basic Service Delivery and Infrastructure Development, hence given the weight of 50.

Another strategic focus of the municipality has been exploiting natural resources. The municipal economic drivers are potentially tourism and agro processing, making **Local Economic Development** a secondary key performance and focus area for the municipality.

Another secondary performance and focus area is around people and systems as it deals with **Municipal Transformation and Institutional Development**. This is also critical as a driver to ensure that the municipality provides the requisite human capacity and appropriate systems to enable efficiencies. This focus area plays a dual role, that of an enabler and support.

Financial Viability may be tertiary as a performance and focus area for 2023/24 however it remains an integral part of municipal functioning as it deals with budgetary and treasury aspects that enable the implementation and accountability of activities conducted. The municipal focus is on building revenue base to give effect to its viability financially. Equally the municipality seeks to be prudent on expenditure and management of finances.

Good Governance and Public Participation is also a tertiary focus for 2023/24. This does not suggest any less importance. Where human capacity is developed and improved, where institutional systems are improved and developed, it is easier to drive proper governance including engagement and participation of the public.

Spatial Planning was adopted as a separate key performance area in 2022/23. This is seeking to ensure that the municipality uses spatial planning as a catalyst for development of the municipality especially the town to create socio economic activity and effective delivery of services.

5.9 The CMCs will make up the other 20% of the Employee's assessment score. CMCs that are deemed to be most critical for the Employee's specific job must be selected from the list below as agreed to between the Employer and Employee

FINANCIAL YEAR: 01 JULY 2023 - 30 JUNE 2024

1. Introduction

A Performance Plan is a strategic management tool that enables the performance of the employee to be assessed in an objective and fair manner. It defines the Council's expectations of the Public Safety and Traffic Management Director's performance agreement to which this document is attached and Section 57 (5) of the Municipal Systems Act, which provides that performance objectives and targets must be based on the key performance indicators as set in the Municipality's Integrated Development Plan (IDP) and as reviewed annually.

This Performance Plan is composed of three distinct plans:

a. Output Plan

The output plan is a plan of what outputs the employee is expected to deliver on. The outputs are defined in terms of the tangible deliverables (product or service). The quality requirements include the standard of the product or service and the time frame within which it must be delivered. Finally, the indicator must reflect what evidence must be produced to demonstrate the delivery.

b. Competency Plan

The competency plan is a plan of what competencies (skills, knowledge, and attitude) the employee must acquire to be able to perform and deliver on the set objectives effectively. It entails the determination of the gap between the required level of competence and the employee's actual level of competence.

c. Development Plan

The development plan is a plan of what development interventions will be undertaken to bridge the gap between the required level of competence and the employee's actual level of competence and thus bring the employee to the desired competency level.

2. Output Plan

2.1 Introduction

The output plan is a plan of what outputs the employee is expected to deliver on. It consists of the key performance areas (KPA's), weighting, outputs, performance indicator, baseline information and a target. A key performance area is a defined or demarcated area of performance. The outputs are defined in terms of the tangible deliverables (product or service). The quality requirements include the standard of the product or service and the time frame within which it must be delivered. The quality requirements are the standards which measure the quality of the service or product.

The baseline information is the current information which is used as a starting point from which performance will be measured. Finally, the indicator must reflect what evidence must be produced to demonstrate the delivery.
